Notes for Traders Lodging CO(Form AHK) Applications

General Information

- (1) While the Notes are prepared to facilitate traders' completion of application for Certificate of Hong Kong Origin – Form AHK (CO(Form AHK)) and highlight some specific data requirements, traders are advised to make reference to Chapter 3 (Rules of Origin) of ASEAN – Hong Kong, China Free Trade Agreement (AHKFTA), the relevant Circulars issued by the Trade and Industry Department (TID) and updated information posted on TID's website from time to time to ensure compliance with the requirements.
- (2) Before lodging a CO(Form AHK) application, please ensure that the goods to be covered fall within a description of products eligible for preferential tariff treatment under the AHKFTA. The goods covered must also have been registered under the Factory Registration (FR) record(s) of the manufacturers and subcontractors (if any). If a CO(Form AHK) application covers goods that are not registered with TID, the application will be deferred or rejected.
- (3) The term "Party/ies" in this Notes refers to Hong Kong and/or ASEAN Member States (AMS) (*Note 1*) whose commitments made under the AHKFTA have entered into force. The updated list of AMS Parties is available at Trade and Industry Department (TID)'s website.
- (4) All CO(Form AHK) applications (including fresh submissions, re-submissions, amendment and cancellation requests) must be completed in English and lodged through electronic trade document submission services. Traders may register with the relevant Electronic Service Providers appointed by the Government in order to use the electronic trade document submission services. Traders who are not ready to make electronic submissions can make use of the paper-to-electronic conversion service provided at designated service centres by the Service Providers for lodging CO(Form AHK) applications. For further information on the electronic services, please contact Brio Electronic Commerce Limited (Tel: 2111 1288), Global e-Trading Services Limited (Tel: 8201 0082) or Tradelink Electronic Commerce Limited (Tel: 2917 8888).

Note 1: The AMS includes Brunei Darussalam, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam.

- (5) Each fresh Certificate of Origin (CO) application will be assigned a Unique Certificate of Origin Reference (UCR) number of 14 characters/digits. Traders should quote this number as a reference in all future correspondence, such as sending message to manufacturer/subcontractor, and making enquiries.
- (6) If the CO(Form AHK) application is approved, an electronic approval message will be sent by the issuing organization to the traders via the electronic trade document submission services. The message includes the CO approval date and an Approval Number of 11 characters/digits. Exporters may print out the collection slip, apply its company chop on it and collect the CO(Form AHK) from the issuing organization.
- (7) Traders may contact the Factory Registration and Origin Certification Branch of TID (Tel no.: 2398 5531/2398 5545) for more information on lodging CO(Form AHK) applications.

Illustrative Example of ROO Application

Good : Juice Drink
 HKHS Code : 2202 9910
 Unit : litre

Applicable ROO : RVC 40
 under AHKFTA

As this item originates in an AMS Party under the AHKFTA and is used in Hong Kong as material for a finished good, "Accumulation" applies. This should be included in the ASEAN – Hong Kong, China Free Trade Area Material Cost and be treated as originating in Hong Kong when calculating the RVC.

(a) Raw Materials:

	Origin	Value (HK\$ per unit)
1. Water	Hong Kong (<i>originating</i>)	0.01 (a)
2. Concentrate	Australia	0.79 (b)
3. Refined sugar	Korea	0.5 (c)
4. Flavour	Thailand (<i>originating</i>)	0.4 (d)
5. Carton Box Container	Korea	0.5 (e)
ASEAN – Hong Kong, China Free Trade Area Material Cost:		0.41 (a) + (d)
Value of Non-Originating Materials, Parts or Produce:		1.79 (b) + (c) + (e)

The value of the packaging material and container in which the good is packaged for retail sale should be taken into account, as non-originating materials in this case, when calculating the RVC.

The costs, insurance and freight (CIF) value at the time of importation or the earliest ascertained price paid for all non-originating materials, parts or produce that are acquired by the producer in the production of the good; non-originating materials include materials of undetermined origin.

Includes wages, remuneration and other employee benefits associated with the manufacturing process.

The costs incurred in placing the good in the ship or other means of transport for export including, but not limited to, domestic transport costs, storage and warehousing, port handling, brokerage fees and service charges.

(b) Other Components (HK\$ per unit):

	Value (HK\$ per unit)
Direct Labour Cost	0.5
Direct Overhead Cost	0.3
Other Costs	0.5
Profit	0.5

Includes, but is not limited to, real property items associated with the production process (insurance, factory rent and leasing, depreciation on buildings, repair and maintenance, taxes, interests on mortgage); leasing of and interest payments for plant and equipment; factory security; insurance (plant, equipment and materials used in the manufacture of the goods); utilities (energy, electricity, water and other utilities directly attributable to the production of the goods); research, development, design and engineering; dies, moulds, tooling and the depreciation, maintenance and repair of plant and equipment; royalties or licences (in connection with patented machines or processes used in the manufacture of the goods or the right to manufacture the goods); inspection and testing of materials and the goods; storage and handling in the factory; disposal of recyclable wastes; and cost elements in computing the value of raw materials, i.e. port and clearance charges and import duties paid for dutiable component.

FOB Price (HK\$ per unit)

4

(c) RVC Calculation:

(i) *Direct/Build-up Method*

$$\text{RVC} = \frac{\text{ASEAN – Hong Kong, China Free Trade Area Material Cost} + \text{Direct Labour Cost} + \text{Direct Overhead Cost} + \text{Other Costs} + \text{Profit}}{\text{FOB Price}} \times 100\%$$

$$\text{RVC} = \frac{\$0.41 + \$0.5 + \$0.3 + \$0.5 + \$0.5}{\$4} \times 100\% = 55.25\%$$

OR

(ii) *Indirect/Build-down Method*

$$\text{RVC} = \frac{\text{FOB Price} - \text{Value of Non-Originating Materials, Parts or Produce}}{\text{FOB Price}} \times 100\%$$

$$\text{RVC} = \frac{\$4 - \$1.79}{\$4} \times 100\% = 55.25\%$$

Hence, the good is originating in this case.
