

## Annex

Mexican authorities on 29 December 2014 published a supplementary resolution setting effective from 2 February 2015 certain reference prices for a range of textile and apparel products (shown below). These prices will be employed only as a reference or guideline and may not be used to determine the customs value of the good. Importers who declare a customs value for their goods that is below the established reference price will be required to append to the import declaration proof of the deposit or security issued by the credit institution or surety authorised to operate customs escrow accounts. The deposit or security must cover the difference between the declared and estimated duties and antidumping measures, whenever applicable.

2. Persons who pay taxes in Mexico in accordance with the provisions of Title II or Title IV, Chapter II of the Income Tax Law and are current with their tax obligations may seek a global security that covers imports made over a period of six months as long as the average price of the goods declared during that period is no more than 30 percent below the estimated price for such goods at the time of importation.
