The "%" columns refers to percentage of net turnover; the amount of each cost item should be expressed as a percentage of net turnover.

Please explain on which basis the individual cost items have been allocated. If an allocation method other than one based on turnover is used, the method must be explained in detail.

The Commission services intend to make the adjustment stated in Article 2(9) in order to construct the export price by deducting all costs incurred between importation and resale, including the SG&A expenses incurred during the investigation period by your company.

An adjustment as stated in Article 2(10)(g) for credit based on the payment terms granted to the first independent buyers will also be made.

If you consider that this would lead to a double deduction, you are requested to submit confirming evidence in order to support your view.
