主席獻辭

Message from the Chairman

首先，我謹代表香港工業總會恭賀今年香港工商業獎—消費產品設計類別的得主。今年的參賽作品極具創意、質量上乘，再一次令我們印象深刻。優秀的設計是製作美觀、優質的功能性產品意念的終極表現，也同時會影響和激發他人的創造力。這是獎項的宗旨，激發人們尋找新意念、達到高標準，這對今天的商業社會來說至關重要。傳統市場萎縮，令我們必須尋找新市場，提升我們的業務。工總一直以來不斷鼓勵工業家採取這些關鍵的步驟，面對挑戰。

今年的大獎得主是轉型升級的典型例子。得獎人最初從事模具製造，後來開始發展自家設計和消費產品，為公司帶來成功。我們必須改變思維，而我相信，設計在這方面能起到巨大作用。我們不僅需要美觀的功能性產品，還需要用更有效和環保的方式來生產這些產品。

香港具有人才和創意，必須積極鼓勵和培養。內地市場正待開發，我們決不能錯失機會。設計師必須意識到他們所起的重要作用，提供能夠吸引消費者、同時又能滿足高效生產的源源創意。

在此，我祝願所有的參賽者獲得佳績，並希望他們能繼續發揚香港創新、優質和務實的精神。

評審委員會從眾多優良設計中選出了獲獎作品，我謹代表香港工業總會感謝他們的辛勞。

劉展灝

香港工業總會主席

Congratulations to this year's winners of the Hong Kong Awards for Industries-Consumer Product Design category (HKAI), as once again we are impressed by the creativity and quality of the products presented for judging. Good design is the culmination of ideas for making attractive quality functional products, but it also influences and triggers off the creativity in others. This is the initiative of the HKAI, inspiring others to seek new ideas and achieve high standards which are vitally important in today's business environment. Shrinking traditional markets force us to look for new ones and to upgrade our whole business activities. The FHKI is continually encouraging manufacturers to take these critical steps to meet the challenges we face.

In the HKAI we have in fact one particular example of upgrade and transform with our winner of the Grand Award this year. Originating from the mould and die industry he started to develop own designs and consumer products which have brought success to the company. We have to change our mindset and I believe that design can play an enormous part in doing so. Not only do we need attractive functional products but more effective ways of producing them in an environmentally acceptable way.

We certainly have the talent and ideas in Hong Kong which must be encouraged and nurtured with enthusiasm. The Mainland market is there waiting for us and we cannot afford to ignore the opportunities. Designers must realise the important part they have to play and continue to develop imaginative ideas that attract consumers and at the same time satisfy efficient manufacturing.

I wish all contestants continued success and encourage them to uphold the Hong Kong spirit of innovation, quality and pragmatism.

The HKAI judging panel has completed a difficult task of selecting winners from the plethora of designs presented to them and on behalf of the FHKI, I wish to thank them for their diligence.

Our DSLR camera housings are waterproof casings, in which camera are placed to facilitate underwater photography; further, the housings allow user to access all important functions of the camera, in the form of push buttons and levers. Maximum creativity is made possible by letting the user change settings without hassle.

Our products are the first of its kind in Hong Kong, our design philosophy can be seen through the thoughtful control designs and placements as well as simple installation and set up procedures of our housings. Installing the camera into the housing requires no tools; all key functions can be reached without letting go of the handles or taking the eye off the viewfinder. Extra large front and rear dials with profound form allow the photographer to control the aperture stops and shutter speed effortlessly. The patented port lock/release mechanism makes changing the front ports hassle-free so that photographers can easily and quickly switch to different lenses between dives.

The innovations made by Nauticam have resulted in five patents and we have two others pending.
