2003年，集團意識到傳統鐘錶錶殼業務增長的瓶頸，開始構思轉型。時值手機的興起以及相關產業鏈開始建立，集團著力研究把鐘錶錶殼的金屬處理工藝技術應用到智能手機及時尚產品的產業。經過調研後，集團認為高端智能產品的市場空間龐大，並會持續增長。集團深信集團生產的金屬部件及產品既可達至傳統手工藝的質量及精準度，亦享有規模量產的成本效益。集團開始整合及拓展資源，包括物色地段及建設新廠房，成立研發部門及實驗室，招聘及培育科研及管理人才，為日後制作及生產智能手機高精密金屬部件及新產品作好準備。在2008年，隨著智能手機及電子產品的主要產業鏈落戶在中國，集團憑著精湛的金屬處理工藝技術，土地及廠房儲備與及可持續發展的企業文化，受到世界知名品牌及高科技客戶的青睞，成為智能新產品供應商的不二之選。

集團現時的產品包括傳統鐘錶、智能手機、智能手錶、電動汽車、智能家居設備等。在過往十年，集團的營業額以10倍增長，傳統鐘錶業務現時佔集團營業額的8%。

集團是次獲得獎項，是對我們三十年來努力的一份支持及肯定。聯豐集團在未來會繼續秉承「取諸社會、用諸社會」的精神，運用精密金屬生產工藝為全球消費者在時尚生活中帶來更好的產品。

Company Overview

Luen Fung Group founded Luen Fung Watch Case Factory, which was engaged principally in the production of traditional watch cases, in Hong Kong in 1988. In 1991, we set up our first factory in Shenzhen to expand the production scale in light of the Chinese economic reform. Our continuous improvement in the craft production and perfectionist company culture have established us as the leader of the watch case manufacturing sector over the last 10 years.

Our incubation of transformation dates back to 2003 when we became aware of the bottleneck in the growth of traditional watch case business. We turned to focus on applying the metal finishing techniques of watch case production to smartphones and fashion-related products. After months of research, we identified the huge market potential of smartphones and high-end devices. We strongly believed that our metal parts and products could combine the precision and quality of traditional craftsmanship with the cost efficiency of mass production. To get ready for potential new orders of highly intricate metal parts and new products for smartphones, we kicked off by building new factories, setting up a R&D department and laboratories, recruiting and training scientific researchers and management professionals. More and more major supply chains of smartphones and electronic devices have moved to China since 2008. Our superb metal finishing techniques, ample facilities, and culture of sustainable development have brought us in partnership with a number of famous international brands and high-technology clients.

Our products can now be found in a wide range of products, including traditional watches, smartphones, smart watches, electric cars, smart household appliances. Our sales turnover has increased by 10 times over the past 10 years and the traditional watch business accounts for 8% of the Group's turnover.

We regard corporate social responsibility as a key element in the Group's sustainable development. Driven by our people-oriented management and commitment to environment and society, we provide our employees with a fair, safe, healthy working environment as well as a platform to develop individually and as a team. We also accelerate our innovation investments by hiring more talents for developing new materials, implementing automation of the manufacturing procedures, acquiring hi-tech manufacturing equipment and upgrading the ERP system. Meanwhile, we have invested over a hundred million dollars into establishing a sewage treatment plant for recycling waste from manufacturing processes and advancing towards zero discharge. Plans on switching to renewable energy have been made to minimise the impact to the environment.

The Grand Award in Upgrading and Transformation comes as an encouragement and acknowledgement of our endeavours in the past 30 years. We will uphold our commitment to social responsibility and continue to apply our proprietary technology to the manufacturing of metal products of the finest quality for consumers worldwide.
